

In Aledade's value based care network, you don't have to face your business challenges alone. Here's how we leveled the playing field in West Virginia last year.

Primary care practices, community health centers, and clinics in West Virginia have been missing a business model that truly rewards their value and gives them the credit they deserve. Our track record of success proves that when primary care organizations have a reliable, transparent, and committed partner, they thrive in value-based care. We are proud to be that partner in the Mountain State.

The Aledade Commitment

Empowering primary care to succeed in value-based care models creates healthier patients and communities, at lower cost for all. As a public benefit corporation, our mission to reinvent health care is at the center of every business decision we make. When you join our mission and model, we:

- Protect your role as the leader of patient care;
- Provide the support your staff and patients need; and
- Share equitably – only making money if you do.
