

# WORKLISTS

## — At A Glance —

The Aledade App's unique Worklist feature ensures administrative efficiency, clinical quality, and coordination throughout your practice. From the exam room to the billing office, the Worklist makes it easier for entire care teams to collaborate without duplicating effort or letting important tasks slip by.

## What is the Worklist?

The Worklist allows your staff to confirm patients are getting regular preventive care, receiving follow-up after hospital discharge and emergency department visits, and are being accurately attributed to your practice. These are key opportunities for you to engage with your patients and ensure they're receiving the care they need, when and where they need it, while streamlining workflows for your staff.

## 5 WAYS the Worklist

### Helps Your Practice Tomorrow

- 1** Build stronger relationships, set important care goals, and review timely health concerns with your patients 
- 2** Streamline administrative workflows by identifying patients who are already scheduled for a visit and add wellness visits to the existing appointments 
- 3** Capture missed revenue opportunities by identifying and outreaching patients in need of preventive care services 
- 4** Overcome staffing shortages and limited resources by eliminating duplication of work across care teams and administrative staff 
- 5** Identify opportunities to engage high priority patients to avoid expensive, avoidable events
